

Community psychology

Total number of ECTS credits		6
Type		Optional
Temporal organisation		Year 4; Semester 7
Modality		Face-to-face
Language		English
DEGREE learning outcomes	Contents	• Introduction to community psychology • Social support and community bonds • Risk and protective factors and community needs • Community intervention in specific populations (minors at risk of exclusion, family violence, gender-based violence, immigration, disability) • Preventive programmes from Community Psychology
	Knowledge and content	CC8 Understand the theoretical bases of psychosocial intervention and the promotion of healthy habits. CC22 Know the main psychosocial characteristics and principles of individual behaviour and the functioning of social groups.
	Skills and abilities	HD2 Communicate the results and conclusions obtained in psychology rigorously. HD3 Apply therapeutic intervention techniques and strategies appropriate to the target population. HD6 Identify risk and protective factors in children, adolescents, adults and older people.
	Competences	CP4 Structure a complete intervention plan adapted to the biopsychosocial characteristics of the case and its context. CP7 Motivate recipients by creating greater adherence to the therapeutic process so that dropout and the probability of relapse are reduced.
SUBJECT learning outcomes		
• CCIP1 Know the risk and protective factors in community psychology. • CPIP1 Develop social intervention or mediation programmes to minimise crime and violence.
